

Theme changes

2011-03-15 11:37:20 by ThomasHAdams

Hello,

Please be patient as I am working on a new web design (theme), as well as updating my current one.

I have been working on a few themes the last few days, and should continue to work on finishing them up shortly. The most recent forum post information (a block) on the home page has been temporarily removed as it is not multi-theme compliant (It does not change backgrounds or colors when you change the theme). If you have any suggestions, or see any issue, please feel free to contact me about it. Thank you for your patience!
